See following page for dilution instructions.

HYDROmorphine INTRAVENOUS INFUSION DOSAGE CHART

Dilution Instructions:

0.5 mg/mL = 50 mg HYDROmorphine in 100 mL

2 mg/mL = 100 mg HYDROmorphine in 50 mL
500 mg HYDROmorphine in 250 mL
1000 mg HYDROmorphine in 500 mL

10 mg/mL = remove 10 mL from 50 mL bag, then add 500 mg to bag
= remove 20 mL from 100 mL bag, then add 1000 mg to bag

50 mg/mL = transfer 2500 mg to an empty sterile bag (empty bag obtained from pharmacy)
[undiluted 50 mg/mL injectable]
